THE FIRST FLY OF SUMMER.
The first fly of summer comes buzzing about. All its million companions will come later on. No least of its kindred, no insect is high to associate with it. This one lonely fly. I'll not leave thee, thou lone one. To lay all thy eggs. I'm on to your system. You're on your last legs. This gently I scatter. The powder around. And soon in the dustpan Thy body'll be found. So keep may they follow Thy brothers and friends. I'll treat them to powder. And compass their ends. When screens fail to stop them And violence they grow. I'll give them a dose that will lay them all low.

THE KENTUCKY SOLDIER.

Did Not Run at the Battle of New Orleans.—General Jackson's "Disclaimer."

Louisville Times.—After the battle of New Orleans, on the 8th of January, 1814, the impression went to the country that General Jackson had said that the Kentuckians had indignantly fled at that battle. In those days news spread slowly, but certain it was that it finally reached the ears of John Adair of Mercer county, who had been ordered to New Orleans by Gen. Isaac Shelby, then Governor of Kentucky, to make provisions for the troops in that department. Col. Gabriel Slaughter, afterward Governor of Kentucky, commanded the Kentuckians in the battle with Gen. John Adair.

He was placed on the South side of the river, and after the British had been defeated upon the North side by Gen. Jackson, in their flight crossed over to the South side in force, and the Kentuckians fell back in good order, which, to doubt, gave rise to the report that they had ingloriously fled from the field.

This incorrect rumor plucked the pride and valor of John Adair, and upon consultation with Jack Makes, then a resident of Mercer county, a man of great wealth for those times, and a celebrated dentist in Virginia in the latter part of 1773, they mounted their horses and, with their holsters across the front of their saddles and their colored valets to bring up the heavy baggage, rode through the thin wild and mountainous portions of Kentucky and Tennessee to the Hermitage, where they were received with courtesy, and extended hospitality by Gen. Jackson. They asked him if it was true that he had given utterance to the rumor then in circulation that the Kentuckians had ingloriously fled at the battle of New Orleans.

With his accustomed frankness, he disclaimed saying anything but praise of both the officers and men on that sanguinary field. John Adair asked him if he would not put his disclaimer to "pen writing," which he promptly did and forever put to sleep a libel upon the name and fame of Kentucky's soldiery in the celebrated battle of New Orleans. It is meet and proper that the acts and deeds of those chivalrous men of a past generation should be recorded for the benefit of the future generations.

Four new passenger coaches went down on the C. and O. yesterday afternoon.

DR. KENTLEY has finally denied that sleeping or stupor is the constant parts of his cure for drunkards, and issued a challenge to any three reputable chemists to meet and analyze the remedy, offering to make the formula known to the world if they make affidavit to the finding of these dangerous drugs in it.

THE MAYSVILLE SANITARIUM.

Satisfactory Progress Made by the Patients.—Cure Rapid and Permanent.

The initial week of the existence of the Maysville Sanitarium House has just been completed. Without special effort

and little advertising on the part of the hospital, the institution is now an assured fact for all time to come, since its first step was on a paying basis. The greatest satisfaction and good is felt by those under treatment, and friends of such parties are enthusiastic in their praise of the rapid progress made. No patient can voluntarily resist the influence of the treatment, and as uncon-

sciously loses his appetite for whisky as he once gained it.

There are now thirteen patients undergoing treatment. The habit has already been broken in all cases after four days' stay. In no instance has a patient felt any bad effect, but in the shortest time regains his former sense of well-being and a glad reliance of his habit.

Fleming and Bracken have both contributed patients to the Sanitarium, and from the many letters of inquiry coming in, the present month will find many from a distance.

Strict privacy is regarded, and if a patient desires no one will be the wiser of his having taken treatment.

The Company has arranged to have a barrel of the famous Blue Lick Water fresh

every other day, to be used in the treatment of the alcoholic habit.

They cure the *Liquor, Opium and Tobacco Habits at the Maysville Sanitarium*. The medical staff is composed of Drs. T. E. Peckett, J. A. Reed and C. S. Owens.

For particulars address THE MAYSVILLE SANITARIUM, or THOMAS R. PRINSTER, Secretary.

KENTUCKY AND WORLD'S FAIR.

Many Cecil Cantrell to the Women of Kentucky.—Important Enterprises.

GEORGETOWN, May 1st, 1892.

To the Women of Kentucky: As a matter of course there necessarily arise private enterprises and individual schemes which strive in various ways to place themselves in connection with and under official recognition of every great movement.

It would presuppose an idyllic state of things were this not the case with relation to the Columbian Exposition, and a trusting public cannot be too carefully warned to weigh all proposed enterprises in which they are called upon to risk either money or credit.

Knowing that nothing of an unreliable nature could possibly be allowed to be issued from our headquarters, I am pleased to endorse the two following plans, one to be known as the "Woman's Dormitory Association," the other as the "Children's Home" of the Women's Department of the Columbian Exposition.

Moreover, I heartily approve and recommend these undertakings to the women of this state, believing that each is greatly needed and can be but prompt action and response be given.

Each movement is fully elaborated in circular letters, and is well worth the attentive and earnest consideration of every loving and thoughtful woman of our country.

If she has no other reliable and economical will present itself as the "Woman's Dormitory Association" for the satisfactory attendance of herself, family and friends at a minimum of expense for either a long or short sojourn in Chicago in 1893, during the most wonderful exhibit ever known to the nations of the earth.

If she be rich, what a blessed boon transferred stock like this would be to some less favored sister! What visions of hope might it not open to some building genius, who has not yet discovered the something for which nature has best fitted her in life.

And the "Children's Home"—does it not make its double appeal for the weary humanity of the world as well as for the comfort and well-being of the child itself when every scene has had its surfeit of the endless shifting scenes such a panorama must present. And does it not call to all the real mother heart of humanity to give to the mother who has no other child a home?

After all is not the most touching invitation made to our young women to forego for a brief week or day in earnest work for others the never-ending social routine of the call, the tea, the rout or the dance? Is it not that girlhood and childhood should thus be linked?

Are not children the real flowers of humanity, and to them should not all things fresh and beautiful naturally belong? In their well-being, comfort, vigor and training lies the pride and hope of family, state and nation.

Then again of all the dancing visions that fill the mind and heart of maidenhood is not the most really beautiful, and the most beautifully real, in nature and dignity, above all the rest, this reality not yet localized, a king not yet crowned nor yet possibly incarnated, who is to step forth some fair day so nobly strong where she is so pitifully weak that she blushes acquiescence to his invitation to make a habit of a home, to complete nature and create a perfect whole. Then the spring dream fades in the ripening summer of reality and weaker arms stretch forth yearningly for their mutual love and support.

Possibly the most wonderful features of the Woman's Department of this great Columbian Exposition are its extensive scope, limitless possibilities, the very limited means at its disposal and the vast amount of uncompensated labor gladly given and willingly rendered by its National officers.

Knowing that love-work is glorified work, we call upon women everywhere and in every way to assist us, themselves and others, and receive the consequent blessing and growth that is sure to follow all unselfish labor. Some may easily give, some induce others to give—the smallest service nor a varied service is not wisely despised.

About 800 shares of the Woman's Dormitory Association and about 100 of the Children's Home have been assigned to Kentucky.

June 1st is the limit given to show what practical answer the women of Kentucky will make to such a call, the investigating and refreshing baptismal of a new century in our statehood.

IN HOC SIGNO VINCES.

EX-GOVERNOR CAMPBELL of Ohio says: "A fighting Democracy always wins. It didn't seem to do it in 1891-92."

With a bill adopted which provides pensions for a certain class of ex-Confederates and bills pending to admit them to the regular army it is plain that the present Democratic House is doing faithfully the work of its masters.

The trend of taste on the part of statesmen in Washington in the last few weeks indicates that Presidential candidates must guard against their rivals running in races as a counter attraction in the very crisis of a convention. Apparently a horse race would empty a convention hall of delegates. No charge to HILL and GORMAN for the suggestion.

The Democratic side burst into a roar of laughter when MEREDITH of Virginia taunted DAN WAGNER, the Union Veteran Congressman, with making a "bully run" at Bull Run. Whether DAN WAGNER was at Bull Run or not, it is certain that he fought on many fields where Union men won. That's the reason why Democrats like MEREDITH don't like him.

REPRESENTATIVE HARTER of Ohio, who also boldly says "I am a Democrat," has other fears than free silver and a Protective Tariff. Listen to him: "The great danger to the Democratic party is that she will marry herself to a few individuals, many of them like Mr. HILL, utterly unworthy to be associated with, while she will divorce herself from the eternal principles of liberty and political equality and equal rights for all men with special privileges for none."

It will not be necessary for the Chicago Convention to frame a platform. The Democratic House is anticipating it and is constructing the platform on which the party will have to go to the people. Free silver, bogus economists, unscrupulous education, upon the navy, upon the work of Indian civilization and upon the National defense and credit, prodigal extravagance in rivers and harbors and a pin-sticking tariff policy are some of the planks.

ONE of the prophecies of the advocate of the McKinley bill was that it would induce foreign manufacturers to come to this country and establish plants here in order to compete with Americans on their own ground.

A TRIUMPH FOR MCKINLEY

This result has already come to pass, for one of the largest Welsh tin plate manufacturers, W. H. EDWARDS, has decided to close his tin-house, or finishing department at Cardiff and to begin at once the erection of ten mills in this country. These mills will be followed by others as fast as the business may require. Mr. EDWARDS will import his black steel plates from his factories at Swansea in the present. Eventually he intends to remove his entire interests here.

The location of the mills has not yet been decided upon. Mr. EDWARDS will arrive here by the *Teniente* and, after consulting with his manager will choose

THE Democrats who are circulating HENRY GEORGE literature should steer clear of Chicago. The police of that enlightened community have a particular antipathy to red flag communists.

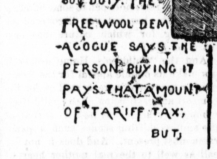

FOR ONCE this session the Democrats have displayed some sense. Knowing that the binding-twine bill was a sham which could not stand discussion, they suppressed all debate and crowded it through under suspension of the rules.

THE Democratic free binding-twine bill was too great a sham and swindle even for the Tariff-reform stomach of *The New York Times*. That mugwump journal usually hails with joy each and every reduction of Protective duties, but the so-called free binding-twine bill was such a transparent piece of electioneer-hungry humbug that it had to draw the line on it. The bill represented stupidity that was not to be applauded even in the name of Tariff Reform. *The Times* was compelled to say: "The removal of the insignificant duty on binding-twine could be of no service to the Western farmers, whom the majority of the members are supposed to have in mind. That duty is only seven-tenths of a cent per pound. The removal of it

THE Tariff Not a Tax.

THE POOR MAN'S SHIRT.

(FLANNEL—ALL WOOL.)

The garment pictured above is made of soft, clean wool, good enough, warm enough and comfortable enough for any one. Probably nowhere else on earth can so good an article be bought for less money. If the Free-Trader doubts, let him come in and examine the shirt and the bill of the merchant who sold it. They are open to inspection in this office.—FROM AMERICAN ECONOMIST.

A site for the works. Mr. EDWARDS is connected with three tin plate firms in Wales, representing an invested capital of \$1,250,000, which will undoubtedly soon be diverted towards this country in whole or in part. His father's firm, that of D. R. EDWARDS & Co., was selected by the British Association at the time of their last visit to Wales as the representative house in the trade. DANIEL EDWARDS was the first man to employ steel in the manufacture of plates. Before that time iron was used. He has always been one of the chief exporters in the trade.

A representative of W. H. EDWARDS said: "We shall, of course, use the DANIEL EDWARDS patent tinning process, which has already been put in operation in the United States at Connaut, O., and in Brooklyn by SOMERS BROS. The works of W. H. EDWARDS and those of his father each employ about 800 men and turn out fully 20,000 boxes a month each. Our Welsh iron makes a steel of a remarkably ductile quality, and until rolling mills are fully established in this country, it will pay us to import our black plates. Ultimately we shall have to import the ore to this country, unless we find that we can arrive at the same result by a mixture of American ore."

The so-called free binding-twine bill was such a fraud and sham that the Democrats were afraid to have it discussed in the House. That is the reason they suppressed debate and put it through under the suspension of the rules.

SPEAKING of a medal to be given Professor SWIFT of Rochester, N. Y., "in grateful recognition of the service which he rendered science in discovering a new comet," is he the man who discovered the tailless comet of '92, to wit, D. R. HILL?
